

# VIRTUAL Book Study

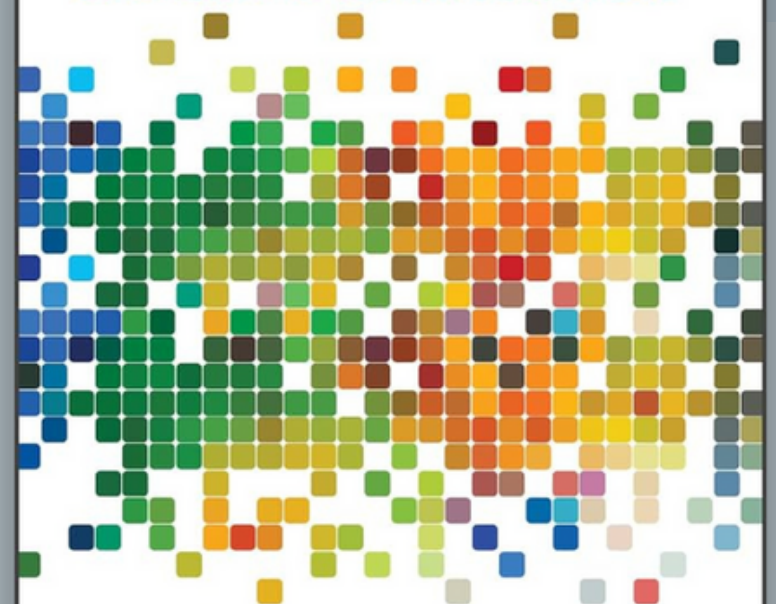

Partners  
for Educational  
Leadership

*Systems for Instructional Improvement* provides anyone interested in the connection between improving classroom instruction, the work of teachers, leaders, and coaches and district strategy with a more detailed roadmap than any other resource. In order to better understand the nuance and implications of this important book, PEL will be hosting a book study, comprising 8 sessions, each of which will feature a presentation by one of the team of authors and an opportunity for participants to converse with each other on the major themes.
